LEADERSHIP EXPERIENCE

User Experience Club

EBoard Member: Content Creator

- Created/designed Instagram posts to inform our club members
- Assisted in discussions about future club activities as well as helping lead discussions during meetings

Global Career Accelerator

Dev Team Leader

- Directed groups of 4-6 individuals efficiently through various design and programming tasks related to web development
- Effectively summarized/shared group findings/solutions with a larger audience usually on a bi-weekly basis

Software: Figma, WordPress, Adobe Photoshop & Illustrator, Excel, Visual Studio Code, Replit, CSV, Notion, Filezilla

EXPERIENCE

RIT Athletics Department

Graphic Designer | May 2025 - Present, Rochester, NY

- Working as an independent designer within a team of other designers and photographers
- Designing various graphics ranging from flyers to digital adverts for the Athletics Department

RIT School of Information

Research Assistant | September 2024 - Present, Rochester, NY

- Working alongside Dr. Roshan Peiris and Zimming Li to assist in the development of a research study focusing on digital role-playing and language learning
- Writing the initial parts of the research paper (literature review, etc.)
- Designing a workshop to teach subjects how to utilize the language learning software

HCC Research and Dev, Human-Centered Computing

- Creating a system, service, or product to help students with their initial onboarding to the university and the HCC program.
- Utilizing user interviews, surveys, card-sorting, and previous research with my team to help convene toward potential design solutions that answer our population's most pressing needs/goals/issues.

Publicis Sapient Capstone Project, Global Career Accelerator

- Developed a UX summary of user pain points and potential website improvements for Homes & Villas by Marriott Bonvoy after utilizing data extracted by Publicis Sapient and personal research
- Used data.csv on a mock of Homes & Villas by Marriott Bonvoy's website to modify and develop different features through JavaScript that were decided on through the UX summary
- Solved original user pain points through the newly developed features

Yolickity Website Redesign, UX Club

- Designing/rebranding a local ice cream shop website with a team of 5
- Utilized a competitive analysis to get a feel for the strengths and weaknesses of 6 similar businesses' pages
- Creating individual inspiration boards and wireframes to narrow down design options by comparing them and utilizing a MoSCoW Chart
- Will start prototyping once the design options are narrowed down
